

Breezo keeps allergens under control

Allergies?

In Western countries, around a quarter of people have allergies (dust mites, dogs, cats, etc.), and in Flanders, about one in ten school-aged children suffer from asthma. Allergies and asthma have doubled in Belgium between 1970 and 2000 and have not decreased. According to the RIZIV, the use of allergy medicines has risen by almost 70 percent in a few years.

The impact of allergy is often underestimated and can affect your daily activities. In addition to nose and eye complaints you can also feel stuffy, sleep poorly or have difficulty concentrating. Fortunately, various treatments are possible.

The sensitivity to dust mites, cat and dog hair has a bad influence on our comfort and quality of life. Few people realize that most allergens can be found everywhere in our environment. Breezo ensures that the allergens in your living environment are significantly reduced. This prevents allergic reactions to the skin or respiratory tract, without side effects.

Our solution:

Breezo spreads probiotics into your environment through ultrasonic waves. Allergens in the air, on contact surfaces, textiles and furniture are neutralized by Breezo probiotics. Our products will deal with the allergens in a 100% natural way.

Benefits:

- Helps anyone suffering from allergens with their breathing and skin.
- Promotes natural balance in every living environment.
- It is a patented bio-technology that is eco-friendly.
- No use is made of biocides or other chemical products
- 100% natural probiotics are used.
- Prevents the presence of fungi in the air, on furniture, in textiles, ...
- Probiotics are also used in yogurt to optimize our intestinal flora.
- The same microorganisms have been used for a long time to clean hospitals.

Results (after 14 days of use):

- Cat: 92.8% reduction in cat allergens.
- Dog: 66.7% reduction of dog allergens.
- Dust mite: 93.7% reduction of house dust mite allergens.

Safety:

The Synbio® products are 100% safe with ingredients that come from nature. The probiotics come from soil and water and the prebiotics from chicory root. The years of application of the products in hospitals, schools and daycare centers testifies to the highest reliability. In addition, the most important quality and safety labels have been awarded to Synbio®. (ATCC class 1, European Food Agency QPS, EU Ecolabel and positive toxicity reports from OECD.)

User friendly:

- Attach or place the Home & Office mister in your living, living or leisure environment.
- 1 mister per space of 50m2
- Set to automatic misting
- Charge once a month and place a new filling
